

Install Mozilla Thunderbird:

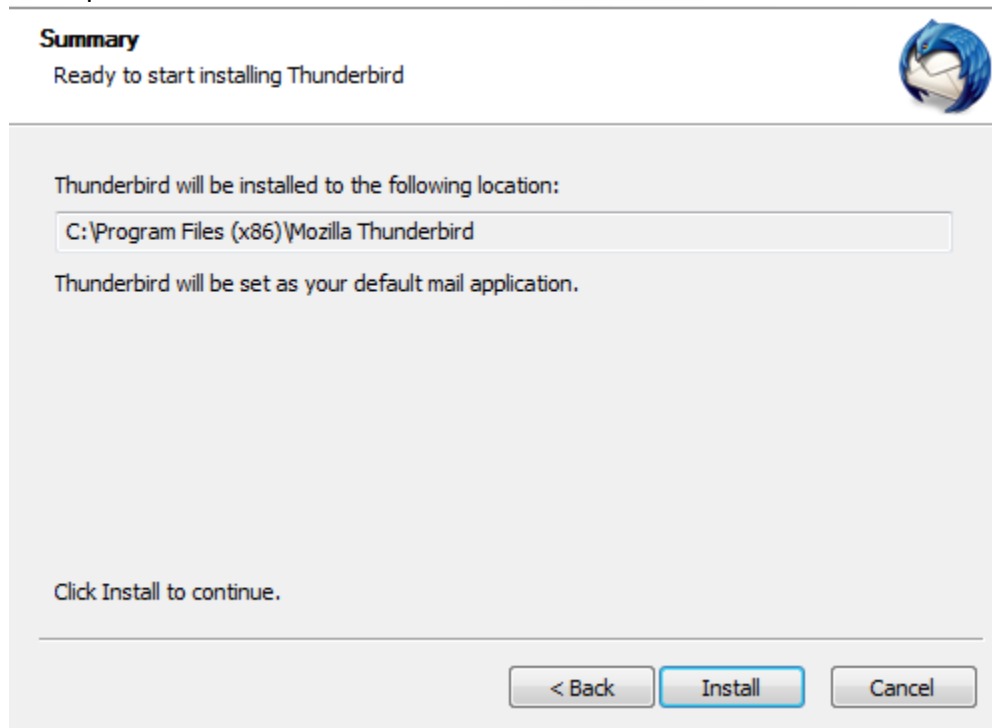

Download the Thunderbird setup file and open it to start the installation process.

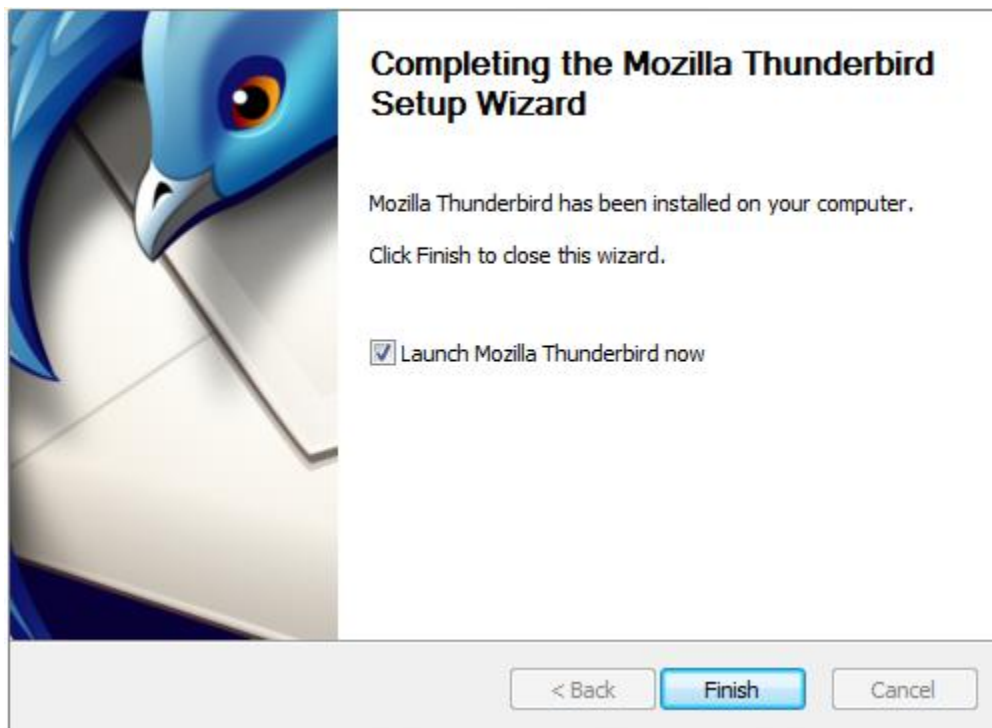

If you got any programs running, close them as advised. Choose **standard**. Also leave the "Use Thunderbird as my default mail application" Press **Next**.

The installer will tell you where Mozilla Thunderbird will be installed, most of you will have the same path and Press Install.

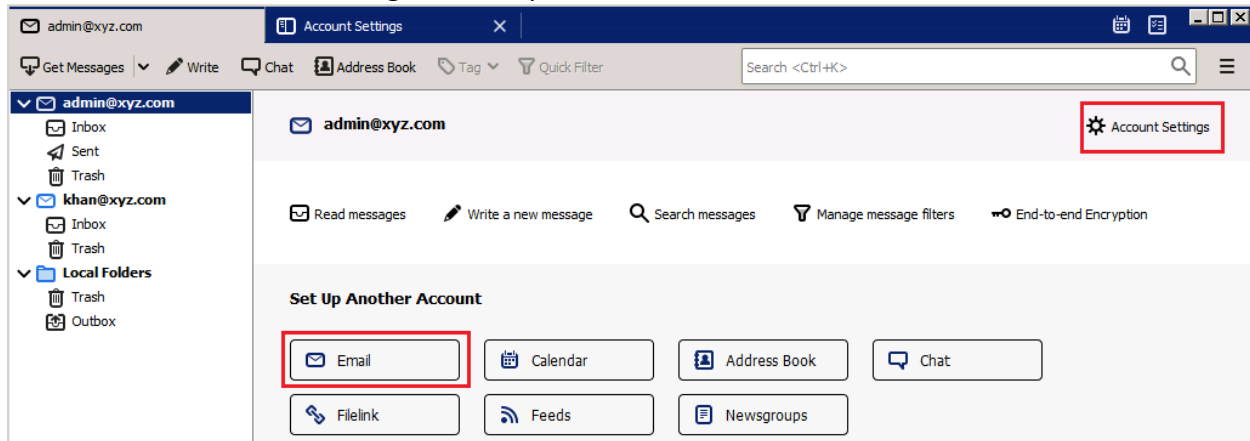

Click **Finish** button to Launch Mozilla thunderbird now.

Setup Email in Thunderbird:

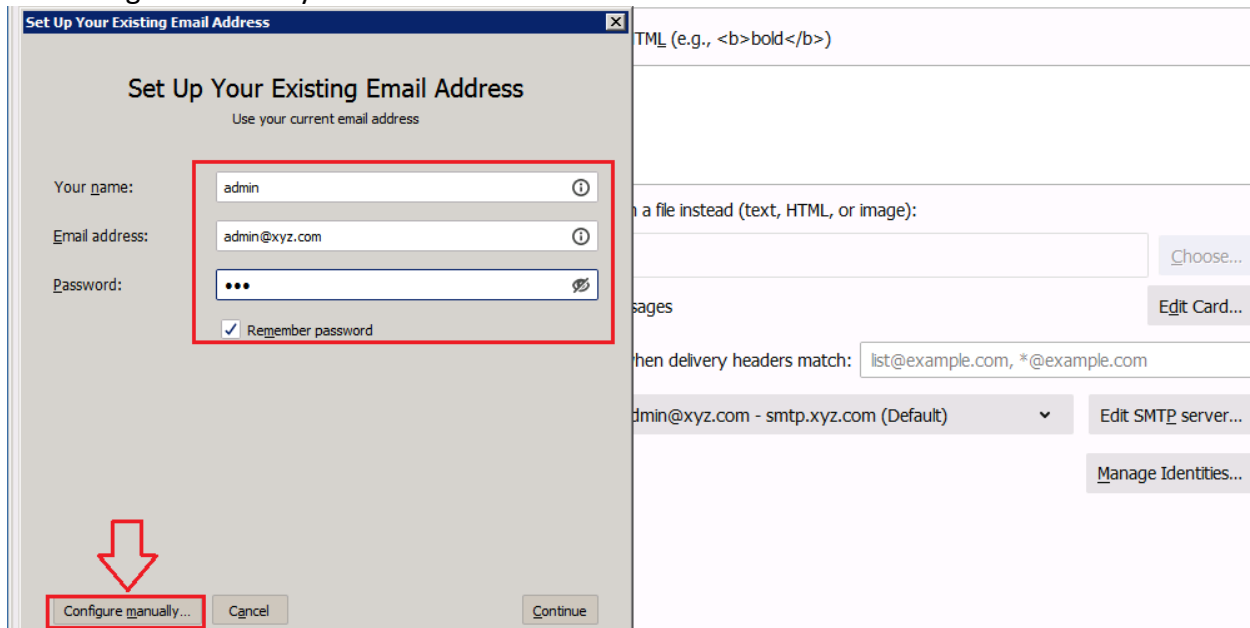

Launch Mozilla Thunderbird, go to Set Up Another account> Email

Or Account Actions > select Add Mail Account

Enter Your Name, Email address and Password, if want to remember the password tick it. Click the Configure Manually button.

Choose protocol **IMAP** for incoming , Server **imap.xyz.com**, port **143** and username, also for outgoing SMTP, port number **25** and username and click **Re-test** or click **Done**.

Set Up Your Existing Email Address

Use your current email address
